Petition to Create a Whatcom County Vaccine Reaction Tracking System

Petition summary and background	Whatcom County has never tracked vaccine reactions and deaths. Whatcom Health Department has referred these issues to the CDC which has a failed tracking system and does nothing to protect citizens from harm. We must demand Whatcom Health Department/Whatcom Health Board start a LOCAL tracking system to make sure ALL safety data is collected and available to the Public for Informed Consent.
Action petitioned for	We, the undersigned, are concerned citizens who urge our leaders to act now to Create a Whatcom County Vaccine Reaction Tracking System.
